PROFESSIONAL SUMMARY

IT professional and U.S. Army veteran with 10+ years of experience in information technology, network administration, and systems support. Skilled in endpoint management, enterprise tools (Active Directory, MECM, Microsoft 365, Jamf), and supporting Windows, macOS, and Linux environments. Seeking an IT role where technical depth and a service-first mindset drive results.

TECHNICAL SKILLS

Operating Systems: Windows 10/11, macOS, Linux

Networking: TCP/IP, cabling, server configuration, monitoring

Virtualization: VMware, Hyper-V, virtual machines

Support: Level II helpdesk, hardware/software troubleshooting

Enterprise Tools: Active Directory, MECM, Jamf, Microsoft 365

Security: IT security fundamentals, patch management, surveillance

Industrial: PLCs, HMIs, industrial robotics, controls

A/V: Campus A/V systems installation & support

WORK EXPERIENCE

Industrial Controls Technician

Greenwood, AR

Whalen Automation and Integration

2024 – Present

- Engineer, implement, and maintain PLCs, HMIs, industrial robots, and diverse control systems.
- Troubleshoot complex industrial control systems and machinery to minimize downtime.
- Collaborate with engineering teams to design and integrate automation solutions.

PC Systems Analyst (Level II Technician)

Fort Smith, AR

University of Arkansas – Fort Smith

2022 – 2024

- Provided Level II desktop support for Windows and macOS across a multi-building campus environment.
- Deployed, imaged, and maintained computers and A/V systems for students, faculty, and staff.
- Utilized Active Directory, MECM, and Jamf for endpoint management and software deployment.
- Collaborated with IT departments to resolve escalated issues and improve support workflows.

IT / Signal Support Specialist (MOS 25B / 25U)

Various Locations (incl. Kuwait, Iraq)

U.S. Army

2012 – 2019

- Managed and monitored network infrastructure; performed computer patching and preventative maintenance on electronic devices.
- Constructed networking cables, configured and maintained server stacks, and monitored server health.
- Supervised IT help desk operations in Kuwait, ensuring rapid resolution of user issues in a high-tempo environment.
- Managed base surveillance systems and flight scheduling operations in Iraq.
